HELLO!

- I am an IT enthusiast, entrepreneur, and agriculturist. I'm a fast learner and I love to learn new things. Technology advance so fast, then I must be able to keep up, that is my short-term goal; to learn everything new about technology. In addition, I have a life time goal that is to fight world hunger and global warming through technology innovation. Save the green earth and contribute something in survival of mankind is really what my goal is all about. I'm not bossy but I have leadership skills. For good or for ill, I'm a person of leadership. I will always do my best and I will never dodge a responsibility. Other than that, I enjoy an extreme cup of coffee, a light discussion, and motorcycle riding.
